Optimizing Supply Chains with Smart IoT Solutions

Making sure your supply chain runs smoothly is crucial for your business's success. But, dealing with old technology and inconsistent digital systems can slow things down and make it harder to compete in the warehousing and logistics sector.

Outdated technology is a big problem for many warehouses and logistics companies. It can slow things down, cause mistakes, and make it tough to keep up with the demands of modern supply chain management. Old systems often need manual work for simple tasks and can't grow with your business like newer technology can.

And when digital systems aren't consistent across your operations, it makes things even harder. While some parts of your business might be up-to-date with sensors and real-time data, other areas might still be stuck using manual methods and outdated technology. This inconsistency can cause inefficiencies and hold back your business from reaching its full potential.

Smart IoT tools provide essential functions that improve operational efficiency, streamline processes, and offer deeper insights into your business operations. They enable task automation, real-time asset monitoring, and data-driven decision-making, essential for maintaining competitiveness in today's dynamic market.

How IoT is used to battle operational issues

In the logistics and industrial sectors, IoT (Internet of Things) technology has become indispensable for addressing operational challenges. By harnessing interconnected devices and sensors, IoT facilitates real-time monitoring and seamless communication, enabling organizations to streamline operations and ensure efficiency in remote or hazardous environments.

Flic, an innovative IoT device, plays a vital role in this industry by offering wearable Smart Buttons tailored to industry needs. These buttons serve as intuitive interfaces for triggering essential functions, providing workers with a straightforward means of accessing key tools or resources. Integrated with industry-specific systems, Flic offers reassurance and peace of mind across various scenarios in logistics and industry settings

Solutions For Logistics & Industry

Reduce Downtime

Improve flows, increase utilization, avoid stockouts and streamline operations, as part of your Industry 4.0 transformation

Push: Restock aisle 10
Double Push: Restock is done
Hold: Cancel request

flic

Solutions For Logistics & Industry

Improve Productivity

Replenish your stock at the push of a button. For example, place an automatic order of 500 M3 screws directly into your system.

Push: No stock available
Double Push: New products ordered
Hold: Restock completed

flic

Solutions For Logistics & Industry

Instant Notification

Send pre-set messages, and notify the right people with just a push of a Button.

Push: Send "John has fallen in location X"
Double Push: Project #003 is finalized
Hold: I need help

flic

Solutions For Logistics & Industry

Easy Data Collection

Easily monitor order progress, stock levels, and
employee productivity using data generated
with a simple push.

Push: Order shipped
Double Push: Tasks completed
Hold: Repair machine no 22

Why companies are choosing Flic

Instant Accessibility: Flic Smart Buttons eliminate the need to search for a phone, providing instant access to your functions with a simple push.

Effortless & Discreet Activation: By bypassing the time-consuming process of unlocking a phone and navigating through apps, Flic simplifies the activation of triggers of your choice.

Versatility and Easy Integration: Flic Buttons have three triggers activated by Push, Double Push & Hold which can be easily customized thanks to our free SDK's.

Enhanced Efficiency: With Flic, your app or service becomes radically more accessible. Whether it's activating equipment, initiating maintenance requests, or triggering specific tasks, the intuitive Flic Smart Buttons empower you to execute actions swiftly and efficiently.

ABOUT US

We are Flic- Shortcut Labs AB, from Stockholm, Sweden. Our mission is to simplify life and empower all people through technology.

Founded in 2013, we are proud to be the world leader in the Smart Button industry, empowering through technology both consumers and businesses around the world.

Our flagship product is the Flic Smart Button. A small wireless programmable controller that allows you to trigger shortcuts to frequently used actions.

Flic is extremely versatile. We provide everything you need so that you can easily customize these buttons to fit your needs! Emergency alarm? Distress signaling? Location sharing? We got you!

Your own app or software

It starts with a push.

HOW IT WORKS

Flic buttons can be easily integrated to your app or business system, thanks to our free SDKs.

Empower your business with physical customizable buttons to enable key functions, making your solution radically more accessible and easier to use.

Your Service or Application

The Easy way to manage and implement new processes

✅ Simplicity: We provide Software Development Kits, libraries, guides, and even an example app so developers have an easy workload without any additional costs.

✅ Device Manager: Our platform allows for centralized management of Flic buttons, enabling administrators to track usage, monitor battery levels, and ensure optimal functionality at all times.

✅ Short Integration Time: With our Open SDK, integration into your existing systems is quick and seamless, minimizing disruption to your operations.

✅ Scalable Solution: No matter the size of the companies you are working with, our button solutions can be scaled to meet your needs, providing flexibility and adaptability as your organization grows.

✅ Long-lasting Battery Life: Our buttons have three-year battery life, powered by easily replaceable coin batteries. This ensures continuous protection without the need for frequent maintenance or downtime.
