Simplifying Parenting and Child Care

In childcare and school environments, the complexities of managing children, coordinating daily routines, and facilitating transparent communication between staff and parents can often present formidable challenges. Traditional methods, such as relying on paper logs and phone calls, not only consume valuable time but are also susceptible to errors, potentially leaving parents feeling disengaged from their child's day-to-day activities.

Flic buttons offer a revolutionary solution poised to simplify these complex tasks and elevate communication standards within educational settings. Our intuitive wireless buttons provide an effortless means of tracking, communication, and cost-effectiveness. By seamlessly integrating with existing systems, Flic empowers users to trigger app functions with ease, whether through a single push, double push, or hold action. Furthermore, the adaptable nature of Flic buttons allows for personalized configurations tailored to the unique requirements of each childcare or school environment.

Discover how Flic can transform the operational landscape of childcare and school management, fostering efficiency, transparency, and enhanced parent engagement.

How IoT is used to battle operational issues

In schools and child care settings, IoT (Internet of Things) technology has emerged as a transformative force, effectively addressing daily challenges. By harnessing interconnected devices, IoT facilitates real-time monitoring and seamless communication, streamlining operations for educational institutions and parents, enhancing efficiency, particularly in demanding environments.

Flic, an innovative IoT device, plays a crucial role in this field by offering tailored wearable Smart Buttons designed specifically for schools and child care facilities. These buttons serve as intuitive interfaces, allowing users to effortlessly trigger essential functions, such as managing schedules or accessing critical resources during daily routines or events. Seamlessly integrated with apps and services, Flic provides confidence and ease of use across various scenarios, revolutionizing the way educators, caregivers, and administrators interact with technology.

Why companies are choosing Flic

Instant Accessibility: Flic Smart Buttons eliminate the need to search for a phone, providing instant access to your functions with a simple push.

Effortless & Discreet Activation: By bypassing the time-consuming process of unlocking a phone and navigating through apps, Flic simplifies the activation of triggers of your choice.

Versatility and Easy Integration: Flic Buttons have three triggers activated by Push, Double Push & Hold which can be easily customized thanks to our free SDK's.

Enhanced Efficiency: With Flic, your app or service becomes radically more accessible. Whether it's meal count, sleep tracking or triggering specific functions, the intuitive Flic Smart Buttons empower you to execute actions swiftly and efficiently.

ABOUT US

We are Flic- Shortcut Labs AB, from Stockholm, Sweden. Our mission is to simplify life and empower all people through technology.

Founded in 2013, we are proud to be the world leader in the Smart Button industry, empowering through technology both consumers and businesses around the world.

Our flagship product is the Flic Smart Button. A small wireless programmable controller that allows you to trigger shortcuts to frequently used actions.

Flic is extremely versatile. We provide everything you need so that you can easily customize these buttons to fit your needs! Track activities? Emergency alarm? We got you!

Your own app or software

It starts with a push.

HOW IT WORKS

Flic buttons can be easily integrated to your app or business system, thanks to our free SDKs.

Empower your app with physical customizable buttons to enable key functions, making your solution radically more accessible and easier to use.

Your Service or Application

The Easy way to manage and implement new processes

✅ Simplicity: We provide Software Development Kits, libraries, guides, and even an example app so developers have an easy workload without any additional costs.

✅ Device Manager: Our platform allows for centralized management of Flic buttons, enabling administrators to track usage, monitor battery levels, and ensure optimal functionality at all times.

✅ Short Integration Time: With our Open SDK, integration into your existing systems is quick and seamless, minimizing disruption to your operations.

✅ Scalable Solution: No matter the size of the companies you are working with, our button solutions can be scaled to meet your needs, providing flexibility and adaptability as your organization grows.

✅ Long-lasting Battery Life: Our buttons have three-year battery life, powered by easily replaceable coin batteries. This ensures continuous protection without the need for frequent maintenance or downtime.
